

# Health and Human Services Events and Activities

The ESRI International User Conference has many presentations and events with hundreds of topics covered. To help you find your way to the Health and Human Services sessions and events, we have prepared a more focused agenda.

## Health and Human Services Industry Solutions Island

Visit the Health and Human Services Industry Solutions Island in the EXPO to learn how public health agencies and ministries, hospitals and health systems, managed care organizations, academic health programs, and human services organizations are using GIS.

## Health and Human Services User Group Luncheon Meeting

Wednesday, July 15  
11:45 AM–1:00 PM  
SDCC, Room 29 D

Please join us for a luncheon to learn more about the Health and Human Services User Group (HUG) and network with other users. This is a great opportunity for both members and nonmembers to meet others who are interested in GIS for health and human services organizations as well as share ideas with the ESRI health and human services team. Thank you to Electronic Data Solutions and Stratus Technologies for sponsoring this event.
