

APOS Systems Inc.

- Extend BusinessObjects XI and Crystal Enterprise with APOS BI Tools
- No-obligation demo downloads at www.apos.com
- Custom SDK development

Customer Feedback

"We were delighted to see how easy it was to implement the APOS Solutions Kit for ESRI, to serve reports back to the ArcIMS user based on selected map features. It took very little technical knowledge of ArcIMS to add the Crystal Report functionality to the standard ESRI HTML map template."

...Alex Bellak
GIS Administrator
City of Troy, Michigan

"Your professional and diligent response and turnaround of a solution helped us keep the project on schedule. Again thank you for all the help and by far this has been the best customer support experience we have ever had."

Customer

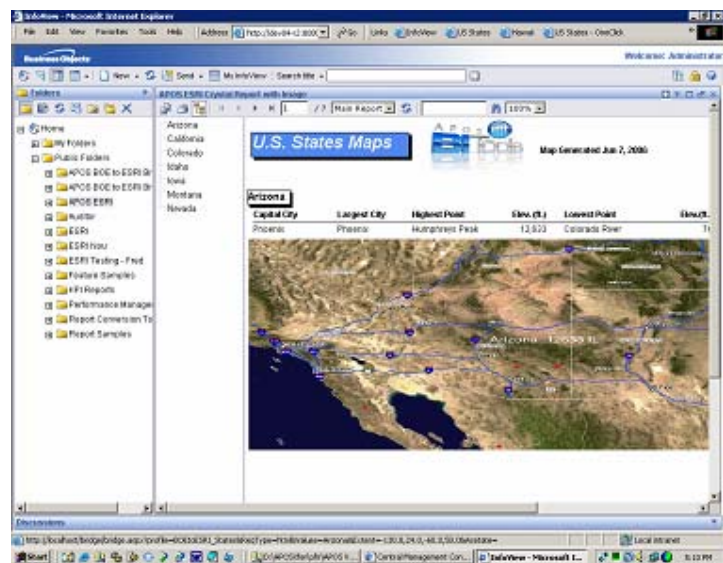

APOS BI TOOLS for BusinessObjects Enterprise XI provide you with powerful solutions to extend your business intelligence system. APOS BI Tools fill the demand for special functions you always wanted, without the need for custom development. As well, APOS development services often use APOS BI Tools as the foundation to fast track custom development projects.

SOLUTIONS KIT FOR ESRI GIS creates a powerful bi-directional bridge between ESRI ArcIMS and BusinessObjects XI Release 2, implemented without extensive custom development!

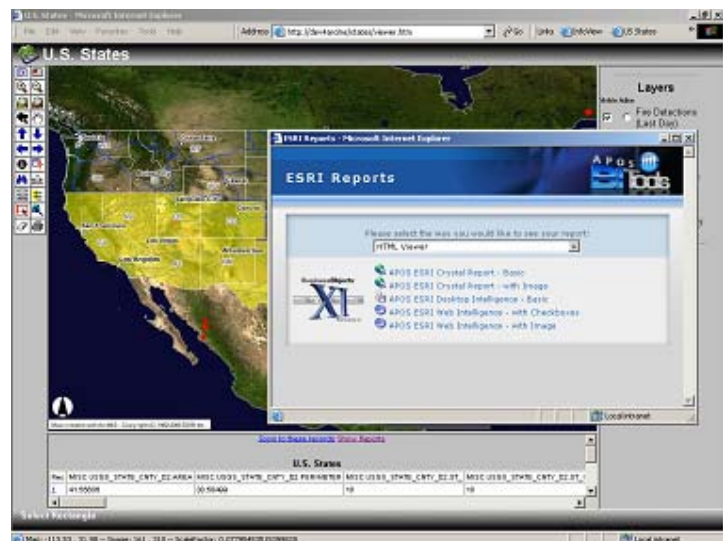

BRIDGE TO ESRI GIS FROM BUSINESSOBJECTS XI

- dynamically embed images from ArcIMS in a report, include report or map data in an acetate layer
- embed a report hyperlink to load the ESRI GIS HTML viewer with report data as highlighted features
- Crystal Reports, Web Intelligence and Desktop Intelligence supported
- integrate ESRI GIS into reports, dashboards or portals

BRIDGE TO BUSINESSOBJECTS XI FROM ESRI GIS

- expose the full power of BusinessObjects XI to an ESRI GIS user
- request Crystal Report, Web Intelligence, Desktop Intelligence, PDF, XLS, DOC while passing user feature selection to the report
- users can select from multiple reports, viewer and format options
